SPECIALVERKTYG

Behov av specialverktyg uppkommer när användningen av universalverktyg är begränsad. Det vill säga att specialverktygen alltid uppfyller krav som standardverktygen inte klarar. T ex då det gäller tillgänglighet och rationalisering vid reparation eller service. Detta gör specialverktygen till viktiga instrument vid arbete med Saab-komponenter.

Denna katalog ger en fullständig översikt över samtliga Saab specialverktyg erforderliga för modellerna 9000, 900 och 9-5.

Vid beställning ska **typsignal 16** användas.

Förvaringen av specialverktygen löser man genom att använda specialverktygstavlor speciellt framtagna av Saab. Dessa ger verkstaden ett rationellt intryck samtidigt som kontrollen över specialverktygen underlättas.

De sex tavlorna är indelade i två grupper

Obligatoriska bastavlor	1	Service Drivaggregat
(Verktyg klass A1)	2	Service Chassi - Kaross

Tilläggstavlor	3	Motor
(Verktyg klass A2)	4	Manuell växellåda
	5	Automatisk växellåda
	6	Hållare

Verktygens taveltillhörighet visas på bildens nedre vänstra hörn i katalogen.

Ex: **T-1** = Verktygstavla 1. Anges inte någon tavla förvaras verktygen förslagsvis i boxar eller på annan plats i verkstaden.

Vissa verktyg levereras i ändamålsriktiga plastlådor, och ska förvaras i dessa. Särskilda krokar finns framtagna för att enkelt kunna hänga dessa lådor i anslutning till respektive tavla.

Tavlorna visas i sin helhet, komplett med artikelförteckning längst bak i katalogen, där även boxarna för alternativ förvaring visas.

Om fler än ett verktyg krävs för att nå rätt användning, eller om verktyget används ihop med något annat verktyg, anges detta på särskild rad under verktygets benämning.

Ex: **x 2 = 2 st.**

= Används tillsammans med.

0 FOREWORD

Som framgår av titelbladet är katalogen indelad i grupper, där varje grupp mellan 2 – 8 i huvudsak motsvarar bilens indelning i respektive verkstadshandbok.

Grupp 1 innehåller **Testers**
Breakoutbox och tillhörande testkablar.

Grupp 2 har en intern indelning bestående av

- Service**
- Block – Smörjning**
- Cylinderhuvud**
- Bränslesystem**
- Turbo**

Under flik 9 i katalogen finns särskilda sidor som innehåller "hjälpverktyg" som inte är absolut nödvändiga, men underlättar arbetet väsentligt. Dessa verktyg kan beställas på samma sätt som övriga verktyg. Hjälpverktygen är i rutan för taveltillhörighet märkta med ett H.

Specialverktygen är i förteckningen klassificerade enligt följande

- A1** = Verktug för service. Verktug för enklare reparationer
(Ex byte av koppling, byte av ventiler)

- A2** = Verktug för kvalificerade reparationer
(Ex renovering av växellådor, styrväxlar)

Saab Automobile AB

SPECIAL TOOLS

Special tools are needed whenever universal tools cannot be employed for a given job. In other words, special tools always fulfill a need that standard tools cannot, for example for accessibility and rationalization of repair or service. This means that special tools are important instruments when working on Saab components.

This catalogue contains a complete list of all the special tools that are necessary for the 9000, 900 and 9-5 models.

When ordering, please quote **type signal 16**.

Special tools are stored on tool boards specially designed by Saab. This makes the workshop look efficient and also makes it easy to keep the special tools in order.

The six boards are divided into two groups:

Obligatory basic boards (Tool class A1)	1	Power Train Service
	2	Chassis and Body Service
Extra boards (Tool class A2)	3	Engine
	4	Manual Gearbox
	5	Automatic Transmission
	6	Holder

The board to which each tool belongs is noted in the bottom left-hand corner of the illustration in the catalog.

For example: **T-1** = Tool board 1. If no board is specified, the tools can be stored in, for example, boxes or elsewhere in the workshop.

Some of the tools are supplied in practical plastic cases and should be kept in them when not being used. Special hooks have been developed on which these cases can easily be hung next to the appropriate tool board.

The boards are illustrated, complete with part description, at the back of the catalog along with the boxes for alternative storage.

If more than one tool is required for correct use, or if the tool is used in combination with other tools, this is specified on a line under the name of the tool.

For example: **x 2 = 2 pieces**.

= Used in combination with.

0 FOREWORD

The catalog is divided into the sections listed on the title page, where each section from 2 to 8 more or less corresponds to the division of the car in the Service Manuals.

Section 1 contains **Testers**

Breakout boxes and associated test leads.

Section 2 is sub-divided into **Service**

Block - Lubrication

Cylinder Head

Fuel System

Turbo

Special pages under index tab 9 in the catalogue cover "auxiliary tools" which are not absolutely necessary but which make certain repairs considerably easier. These tools can be ordered in the same way as other tools. The box indicating the board to which the auxiliary tools belong is marked with an H.

The nomenclature of special tools is classified as follows:

A1 = Tools for service. Tools for simple repairs
(e.g. changing the clutch, changing valves).

A2 = Tools for complicated repairs
(e.g. reconditioning gearboxes, steering gear)

Saab Automobile AB

0 FOREWORD

SPEZIALWERKZEUGE

Der Bedarf an Spezialwerkzeugen entsteht, wenn die Anwendung von Universalwerkzeugen begrenzt ist, d.h. Spezialwerkzeuge erfüllen immer die Anforderungen, die Standardwerkzeuge nicht leisten können. Z.B. was die Zugänglichkeit und die Rationalisierung bei Reparaturen oder Service betrifft. Dies macht Spezialwerkzeuge zu wichtigen Instrumenten bei der Arbeit mit Saab-Komponenten.

Dieser Katalog bietet eine vollständige Übersicht über alle Spezialwerkzeuge, die für die Modelle 9000, 900 und 9-5 erforderlich sind.

Bei Bestellung muß **Typsignal 16** verwendet werden.

Die Aufbewahrung von Spezialwerkzeugen löst man dadurch, daß Spezialwerkzeugtafeln aufgestellt werden, die speziell von Saab entwickelt wurden. Diese verleihen der Werkstatt einen rationellen Eindruck, gleichzeitig wird die Kontrolle über die Spezialwerkzeuge erleichtert.

Diese sechs Tafeln sind in zwei Gruppen eingeteilt

Obligatorische Grundtafeln	1	Service Antriebsaggregat
(Werkzeuge Klasse A1)	2	Service Fahrwerk - Karosserie
Zusatztafeln	3	Motor
(Werkzeuge Klasse A2)	4	Schaltgetriebe
	5	Automatikgetriebe
	6	Halter

Die Tafelzugehörigkeit der Werkzeuge ist in der linken unteren Ecke im Katalog wiedergegeben.

Beispiel: **T-1** = Werkzeugtafel. Fehlt die Angabe einer Tafel, werden die Werkzeuge am besten in Kästen oder an einem anderen Platz in der Werkstatt aufbewahrt.

Bestimmte Werkzeuge werden in zweckmäßigen Kunststoffbehältern geliefert, in denen sie auch aufbewahrt werden müssen. Es gibt besondere Haken, mit denen diese Behälter im Anschluß an die jeweiligen Tafeln aufgehängt werden können.

Die Tafeln werden komplett ganz hinten in diesem Katalog gezeigt – und zwar auch mit Artikelverzeichnis. Auch die Kästen für anderweitige Aufbewahrung sind dort mit aufgeführt.

Wenn mehrere Werkzeuge notwendig sind, um die richtige Anwendung zu erhalten – oder aber, wenn Werkzeuge zusammen mit einem anderen Werkzeug verwendet werden, ist dies auf einer speziellen Zeile unter der Bezeichnung des jeweiligen Werkzeugs angegeben.

Beispiel: **x 2 = 2 Stück.**

= Wird damit zusammen verwendet.

0 FOREWORD

Wie aus dem Titelblatt hervorgeht, ist der Katalog in Gruppen eingeteilt, wobei jede Gruppe zwischen 2 – 8 hauptsächlich der Einteilung des Fahrzeugs im jeweiligen Werkstatthandbuch entspricht.

Gruppe 1 enthält **Testgeräte**
Systemtester und dazugehörige Testkabel

Gruppe 2 hat eine interne Einteilung, und zwar **Service**
Block - Abschmierung
Zylinderkopf
Kraftstoffsystem
Turbo

Unter Abschnitt 9 im Katalog finden sich besondere Seiten, die "Hilfswerkzeug" enthalten, das nicht unbedingt notwendig ist, die Arbeit aber wesentlich vereinfacht. Dieses Werkzeug kann auf die gleiche Weise wie das sonstige Werkzeug bestellt werden. Das Hilfswerkzeug wird im Feld mit der Tafelzugehörigkeit mit einem H gekennzeichnet.

Die Spezialwerkzeuge sind in dem Verzeichnis wie folgt klassifiziert

A1 = Werkzeug für Service, Werkzeug für einfachere Reparaturen
(Z.B. Kupplungsaustausch, Ventilaustausch).

A2 = Werkzeuge für qualifizierte Reparaturen
(Z.B. Überholung von Getrieben, Lenkgetrieben)

Saab Automobile AB

0 FOREWORD

OUTILLAGE SPECIAL

Un outillage spécial est utilisé quand l'emploi d'outils universels est limité; l'outillage spécial remplit donc toujours une fonction que l'outillage universel ne peut exercer. Par exemple, dans le domaine de l'accessibilité et de la rationalisation, lors d'une réparation ou d'un service. C'est donc à l'occasion d'un travail sur les composants Saab que l'outillage spécial prend toute son importance.

Ce catalogue répertorie tous les outils spéciaux Saab nécessaires aux modèles de Saab 9000, 900 et 9-5.

Utiliser le **signal type 16** pour commander.

Les tableaux Saab prévus pour les outils spéciaux permettent de résoudre tout problème de rangement éventuel. De plus, ils confèrent à l'atelier un aspect rationnel et facilitent la vérification de ces outils.

Les six tableaux peuvent être divisés en deux groupes

Les tableaux de base obligatoires (Outils classe A1)	1	Service groupe de propulsion
	2	Service châssis-carrosserie

Les tableaux supplémentaires (Outils classe A2)	3	Moteur
	4	Boîte de vitesse manuelle
	5	Boîte de vitesse automatique
	6	Dispositif de maintien

L'appartenance de l'outil est indiqué dans le coin inférieur gauche de la figure catalogue.

Ex. **T-1** = Tableau d'outils 1. Si aucune information n'est fournie concernant un tableau, l'outil peut se trouver dans des casiers ou ailleurs dans l'atelier.

Certains outils sont livrés dans des coffrets en plastique. Conservez ces coffrets pour ranger les outils. Vous trouverez également des crochets spéciaux permettant d'accrocher ces coffrets aux différents panneaux.

Les tableaux sont montrés globalement et complets; la liste des articles figure à la fin du catalogue et même les casiers de rangement éventuels sont indiqués.

Si plus d'un outil est nécessaire pour une utilisation correcte ou si l'outil doit obligatoirement s'employer avec un autre, on en trouvera mention sous la dénomination de l'outil.

Ex: **x 2 = 2 pièces.**

= doit être employé avec.

0 FOREWORD

Comme l'annonce la première page, le catalogue est divisé en divers groupes dont chacun (de 2 à 8 généralement) correspond à une partie de la voiture dans le manuel d'atelier.

Le groupe 1 comporte **les Testeurs**
le Bornier de contrôle et les câbles de test y afférents.

Le groupe 2 possède une répartition interne comprenant **Service**
Bloc - Graissage
Culasse
Système de carburant
Turbo

Certaines pages de la section 9 sont consacrées aux outils facultatifs; ces outils ne sont pas indispensables mais facilitent le travail. Si vous désirez les recevoir, utilisez la même procédure de commande que les outils spéciaux. Les outils facultatifs portent l'indice de localisation H.

L'outillage spécial est classé dans la liste de la manière suivante

- A1** = Outil de service. Outil destiné aux réparations simples
(remplacement de l'embrayage, de soupapes)

- A2** = Outils destinés à des opérations qualifiées
(ex. remplacement des boîtes de vitesses, vitesses de commande)

Saab Automobile AB

0 FOREWORD

HERRAMIENTAS ESPECIALES

Las herramientas especiales son necesarias cuando queda limitado el uso de las herramientas universales. O lo que es lo mismo, con las herramientas especiales se pueden realizar aquellos trabajos no posibles con las herramientas standard. Por ejemplo en lo que respecta al acceso y racionalización durante los trabajos de reparaciones o servicio. Las herramientas especiales son así un instrumento importante cuando se trabaja con los componentes Saab.

Este catálogo le proporciona un registro completo de todas las herramientas especiales Saab necesarias para los modelos 9000, 900 y 9-5.

Al realizar el pedido deberá utilizarse **la señal tipo 16**.

Para la conservación de las herramientas especiales se pueden utilizar los cuadros de herramientas especiales diseñados por Saab. Estos ayudan a mantener el taller despejado al mismo tiempo que facilitan el control sobre las herramientas especiales.

Los seis cuadros están divididos en dos grupos

Cuadros básicos obligatorios (Herramientas clase A1)	1	Servicio Grupo de propulsión
	2	Servicio Chasis - Carrocería
Cuadros adicionales (Herramientas clase A2)	3	Motor
	4	Caja de cambios manual
	5	Caja de cambios automática
	6	Soportes

La pertenencia de las herramientas a los distintos cuadros se indica en la esquina inferior izquierda en el catálogo.

Ejemplo: **T-1** = Cuadro de herramientas 1. Si no se indica ningún cuadro, la herramienta puede ser conservada en cajas o en algún otro lugar en el taller.

Algunas herramientas son suministradas en cajas de plástico especiales y deberán ser guardadas en las mismas. Existen ganchos prácticos para colgar estas cajas junto a cada cuadro respectivo.

Los cuadros enteros se muestran completos con su denominación de número de artículo en las últimas páginas del catálogo, lugar donde también se presentan las cajas de almacenamiento alternativo.

Si para los trabajos son necesarias más de una herramienta, o si la herramienta se utiliza con alguna otra herramienta, ésto se indica en una línea especial debajo de la denominación de la herramienta.

Ejemplo: **x 2 = 2 unidades.**

= Se utiliza junto con.

0 FOREWORD

Tal y como se desprende de la primera página, el catálogo está dividido en grupos, en el que cada grupo entre 2 - 8 corresponde a la división del automóvil en los distintos manuales de servicio.

El grupo 1 comprende los **Probadores**
Caja Breakoutbox y cables de prueba correspondientes.

El grupo 2 está dividido internamente y comprende **Servicio**
Bloque motor - Lubricación
Culata
Sistema de combustible
Turbo

Las páginas especiales incluidas detrás de la pestaña 9 en el catálogo presentan algunas "herramientas auxiliares" que, aunque no son absolutamente necesarias, facilitan considerablemente los trabajos. Estas herramientas pueden pedirse de la misma manera que el resto de herramientas. Las herramientas auxiliares están marcadas con una H en la casilla para la pertenencia a cuadro.

Las herramientas especiales presentadas en el catálogo han sido además clasificadas según lo siguiente

A1 = Herramienta para servicio. Herramienta para reparaciones sencillas
(Ej. cambio del embrague, cambio de las válvulas)

A2 = Herramienta para reparaciones exigentes
(Ej. renovación de la caja de cambios, engranajes de dirección, etc.)

Saab Automobile AB

0 FOREWORD

ATTREZZI SPECIALI

La necessità di attrezzi speciali si fa sentire quando l'impiego degli utensili universali è limitato. Ciò significa cioè che gli attrezzi speciali soddisfano sempre esigenze che non possono essere poste agli utensili standard. Ad esempio, per ciò che riguarda la disponibilità e la razionalizzazione delle riparazioni e del servizio di assistenza. Ciò rende gli attrezzi speciali strumenti importanti per le operazioni abbinate alle componenti Saab.

Questo catalogo fornisce un panorama completo degli attrezzi speciali necessari per operare sulle Saab 9000, 900 e 9-5.

Per le ordinazioni si deve impiegare il **segnale di tipo 16**.

La conservazione degli attrezzi speciali viene agevolata dall'impiego dei quadri porta-attrezzi speciali realizzati appositamente dalla Saab. Essi conferiscono all'officina un aspetto razionale e ordinato e agevolano il controllo degli attrezzi speciali.

I sei quadri sono suddivisi in due gruppi

Quadri base obbligatori (Attrezzi della classe A1)	1	Assistenza gruppo propulsore
	2	Assistenza telaio - Carrozzeria
Quadri supplementari (Attrezzi della classe A2)	3	Motore
	4	Cambio manuale
	5	Cambio automatico
	6	Sostegni

L'appartenenza degli attrezzi ai rispettivi quadri è indicata nell'angolo inferiore sinistro della figura, nel catalogo.

Ad esempio, **T-1** = Quadro porta-attrezzi 1. Se non viene indicato nessun quadro, gli attrezzi devono essere conservati in scatole o in altri punti dell'officina.

Alcuni attrezzi sono forniti in apposite scatole di plastica e devono essere conservati all'interno di esse. Sono stati messi a punto appositi ganci per appendere queste scatole di plastica ai quadri porta-attrezzi.

I quadri sono mostrati completi di numeri di articolo alla fine del catalogo, dove sono mostrate anche le scatole per la conservazione alternativa.

Se si richiede più di un attrezzo per ottenere un impiego corretto, oppure se l'attrezzo s'impiega insieme con un altro attrezzo, ciò viene indicato in una riga speciale sotto la denominazione dell'attrezzo.

Es: **x 2 = due attrezzi.**

= s'impiega assieme a.

0 FOREWORD

Come risulta dalla pagina dell'indice, il catalogo è suddiviso in gruppi ed ogni gruppo, da 2 a 8, corrisponde alla suddivisione dell'automobile nei rispettivi manuali d'officina.

Il gruppo 1 contiene **Dispositivi di collaudo**
Breakoutbox e relativi cavi di collaudo

Il gruppo 2 ha una suddivisione interna composta da **Assistenza**
Blocco - Lubrificazione
Testa dei cilindri
Impianto di alimentazione
Turbocompressione

La sezione 9 del catalogo contiene "attrezzi complementari" che non sono strettamente necessari per l'assistenza, ma semplificano decisamente il lavoro. La procedura di ordinazione di questi attrezzi è simile a quella degli attrezzi speciali. Gli attrezzi complementari sono contrassegnati con una H nella casella con indicazione del quadro di appartenenza.

Nell'elenco, gli attrezzi speciali sono classificati nel modo seguente:

- A1** = Attrezzi per operazioni di assistenza e riparazioni semplici
(ad es: sostituzione della frizione, sostituzione delle valvole).

- A2** = Attrezzi per riparazioni complesse (ad es: rimessa a nuovo di cambi, scatole dello sterzo)

Saab Automobile AB

0 FOREWORD

SPECIAAL GEREEDSCHAP

Wanneer het universele gereedschap om de één of andere reden niet kan worden gebruikt, dient er van speciaal gereedschap gebruik te worden gemaakt. D.w.z. dat het speciale gereedschap altijd voldoet aan eisen waaraan universeel gereedschap juist niet aan voldoet. Dit geldt bijvoorbeeld voor bereikbaarheid en rationalisering van reparatie en service. Het speciale gereedschap is dus een belangrijk instrument bij alle werkzaamheden aan Saab-componenten.

Deze catalogus geeft een compleet overzicht van al het speciale gereedschap dat u nodig hebt voor werkzaamheden aan de modellen Saab 9000, 900 en 9-5.

Geef bij bestelling **typesignaal 16** aan.

Het opbergen van het gereedschap kan worden opgelost door gebruik te maken van de gereedschapsborden voor speciaal gereedschap. Deze borden geven aan de werkplaats een rationele indruk en gelijktijdig kunnen de verschillende gereedschappen op een overzichtelijke manier worden opgehangen.

Deze zes gereedschapsborden zijn in twee groepen onderverdeeld:

Verplichte basis gereedschapsborden (Gereedschap klasse A1)	1	Service Aandrijfaggregaat
	2	Service Chassis - Carrosserie

Extra gereedschapsborden (Gereedschap klasse A2)	3	Motor
	4	Handgeschakelde versnellingsbak
	5	Automatische versnellingsbak
	6	Houders

De aanduiding van het bord waarop het gereedschap

Het bord waarop het gereedschap thuishoort wordt in de linker benedenhoek van de afbeelding aangegeven.

Bijv. **T-1** = Gereedschapsbord 1. Als er geen bord wordt aangegeven, kan het gereedschap bij voorkeur in aparte kisten of op een andere plaats in de werkplaats worden opgeborgen.

Sommige gereedschappen worden in praktische kunststof dozen geleverd en moeten in deze dozen worden bewaard. Er zijn speciale haken te verkrijgen waarmee u deze dozen eenvoudig in de buurt van het bijbehorende gereedschapsbord kunt ophangen.

De gereedschapsborden worden acherin deze catalogus aangegeven, compleet met artikellijsten. Hier kunt U ook de speciale opberkkisten terugvinden.

Als er voor het juiste gebruik van een gereedschap meerdere stukken gereedschap nodig zijn, of als een gereedschap in combinatie met een ander gereedschap moet worden gebruikt, wordt dit op een aparte regel onder de naam van het gereedschap aangegeven.

Bijv. **x 2 = 2 stuks.**

= Wordt gebruikt in combinatie met.

0 FOREWORD

Zoals uit de voorpagina blijkt is de catalogus in verschillende groepen ingedeeld, waarbij iedere groep tussen 2 - 8 hoofdzakelijk overeenkomen met de indeling van de auto in de respectievelijke werkplaatshandboeken.

Groep 1 bevat Testers
Breakoutbox en daartoe behorende testbedrading.

Groep 2 heeft een interne indeling die bestaat uit Service
Motorblok - Smering
Cilinderkop
Brandstofsysteem
Turbo

Onder tabblad 9 van de catalogus vindt u speciale bladzijden met "hulpgereedschap" dat weliswaar niet geheel onontbeerlijk is maar de werkzaamheden wel aanzienlijk kan vereenvoudigen. Dergelijk gereedschap bestelt u op dezelfde manier als het overige gereedschap. Het hulpgereedschap wordt aangeduid met een H in het vakje voor het bijbehorende gereedschapsbord.

Het speciale gereedschap is in het overzicht als volgt geclassificeerd

- A1** = Gereedschap voor servicewerkzaamheden. Gereedschap voor eenvoudige reparaties (bijv. het vervangen van koppelingen of ventielen).
- A2** = Gereedschap voor ingewikkelde reparaties (bijv. revisie van versnellingsbak, stuuroverbrenging)

0 FOREWORD

ERIKOISTYÖKALUT

Erikoistyökalujen tarve syntyy, kun yleistyökalut eivät ole käyttökelpoisia työn suorittamiseen. Toisin sanoen erikoistyökalut täyttävät aina ne vaatimukset, joista yleistyökalut eivät selviä. Kun esim. on kysymys sopivuudesta ja rationalisoinnista korjauksen tai huollon yhteydessä. Tämä tekee erikoistyökaluista tärkeän välineen Saab-komponentteihin kohdistuvien töiden yhteydessä.

Tämä luettelo on täydellinen katsaus kaikkiin Saabin erikoistyökaluihin, joita tarvitaan malleissa 9000, 900 ja 9-5.

Tilattaessa pitää käyttää **tyyppimerkintää 16**.

Erikoistyökalujen säilytys ratkaistaan käyttämällä Saabin erityisiä työkalutauluja. Tämä antaa korjaamolle rationaalisen vaikutelman samalla, kun erikoistyökalujen valvonta helpottuu.

Kuusi taulua on jaettu kahteen ryhmään

Pakolliset perustaulut (Työkalut luokka A1)	1	Huolto Moottorivaihteisto
	2	Huolto Alusta - Kori
Lisätaulut (Työkalut luokka A2)	3	Moottori
	4	Käsivalintainen vaihteisto
	5	Automaattivaihteisto
	6	Pidikkeet

Taulu, johon työkalu kuuluu, ilmoitetaan luettelon kuvan vasemmassa alakulmassa.

Esim: **T-1** = Työkalutaulu 1. Jos taulua ei ilmoiteta, työkaluja säilytetään laatikoissa tai muussa paikassa korjaamolla.

Tietyt työkalut toimitetaan tarkoituksenmukaisissa muovilaatikoissa, ja ne tulee myös säilyttää niissä. Käyttöön on otettu erityiset koukut näiden laatikoiden ripustamiseksi yksinkertaisesti ko. tauluun.

Taulut esitetään myöhemmin omana kokonaisuutenaan, täydellisinä työkaluluetteloineen tämän kirjan lopussa, jossa esitetään myös laatikot vaihtoehtoista säilytystä varten.

Jos asianmukaista käyttöä varten tarvitaan useampi kuin yksi työkalu, tai jos työkalua käytetään yhdessä jonkin muun työkalun kanssa, tämä ilmoitetaan erityisellä rivillä työkalun nimen alla.

Esim. **x 2 = 2 kpl.**

= käytetään yhdessä näiden työkalujen kanssa.

0 FOREWORD

Kuten otsikkosivusta ilmenee, luettelo on jaettu ryhmiin, joissa jokainen ryhmä välillä 2 - 8 pääasiallisesti vastaa auton korjaamokäsikirjan jakoa.

Ryhmä 1 sisältää Testerit

Breakout-rasian ja siihen kuuluvat testikaapelit.

Ryhmä 2 on sisäisesti jaettu seuraavasti Huolto

Lohko - Voitelu

Sylinterinkansi

Polttoainejärjestelmä

Turbo

Välilehden 9 alla luettelossa on erityiset sivut joissa ovat "aputyökalut", jotka eivät ole ehdottoman välttämättömiä, mutta helpottavat työtä olennaisesti. Nämä työkalut voidaan tilata samalla tavalla kuin muutkin työkalut. Aputyökalut ovat tauluun kuuluvien ruudussa, merkitty kirjaimella H.

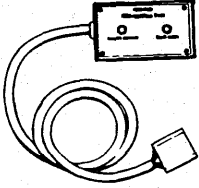

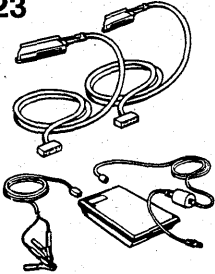

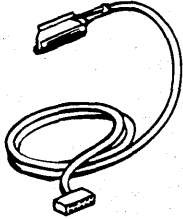

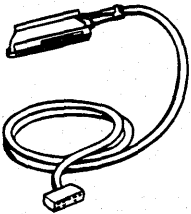

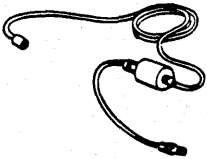

Erikoistyökalut on luettelossa luokiteltu seuraavasti

A1 = Huoltoon kuuluvat työkalut. Yksinkertaisten korjausten edellyttämät työkalut.
(Esim. kytkimen vaihto, venttiilien vaihto)

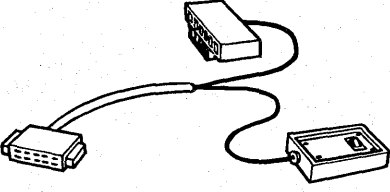

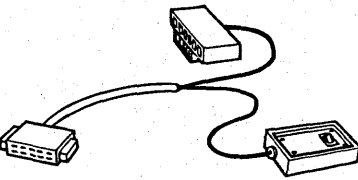

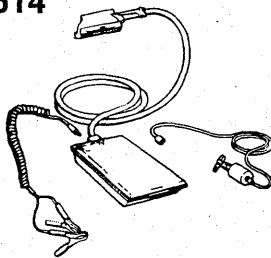

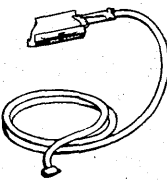

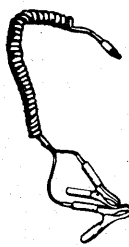

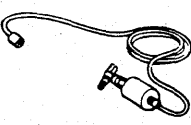

A2 = Työkalut vaativiin korjauksiin
(esim. vaihteistojen, ohjausvaihteiden kunnostus)
